

No To The Refugee Invasion In The Adelaide Hills!

The refugee numbers are limitless and the invasion is on. The government knew an influx would happen and they planned months before the election to hand over army bases and other facilities to these often cashed up 'asylum-seekers'. They will then grant homes, welfare, services. Call it whatever you will, but we call it the culture-busting of the Aussie identity, a part of the process of the recolonization of your land. How many are coming in the next 30 years? A million. It's time to resist.

If You Don't Fight You Lose!

Australia First Party proposes the model of a Community Strike - which means organized passive resistance:

No Australian should collaborate in any way with any government agency which operates the project.

No Australian should communicate with any so-called refugee.

No Australian should accept any employment arising from the intrusion.

No Australian should attend any church or community group that supports the refugee invasion.

All should shun and avoid any person who violates these rules.

The people of the area should ensure the election of fighting councillors to defend their interests at local level.

Australians should affiliate to and support their Australian heritage or community organization of choice to keep identity and resist.

For A Community Strike And Passive Resistance
